The IMAGERY ANALYSIS SERVICE NOTES is a periodic publication of the DDI Imagery Analysis Service, the departmental PI organization of CIA.

This publication highlights significant or timely intelligence items derived from photography.

The interpretations in this publication represent preliminary views which are subject to modification in the light of further information and more complete analysis.

WARNING

This document contains information affecting the national security of the United States within the meaning of the espionage laws U. S. Code Title 18, Sections 793, 794. The law prohibits its transmission or the revelation of its contents in any manner to an unauthorized person, as well as its use in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States. It is to be seen only by personnel especially indoctrinated and authorized to receive information in the designated control channels. Its security must be maintained in accordance with regulations pertaining to TALENT-KEYHOLE Control System.

NORTH VIETNAM

Kep-Hon Gai Rail Line

25X1D

Construction of the meter-gauge rail line between Kep and Hon Gai, under way since about [] is essentially complete in []. When operational the rail line will connect the Hon Gai coal mines with North Vietnam's industrial region.

Photography of [] shows that, except for three bridges damaged by floods in [] the rail line has been completed (see Figure 2). One of the bridges had been completed and the other two had almost been completed when they were damaged by the floods.
